

TECOFOIL / TECOLINE / TECOTOP

Product description

- **TECOFOIL / TECOLINE** are endless single-layer foils and edging tapes with a lacquered finish, manufactured from special non-fading base papers, in plain colours or printed with a woodgrain or fancy patterns and impregnated with thermosetting resins.
- **TECOTOP** is a multi-layer material with a superior melamine finish.

Ecological clearance

- **Heavy metals:** The whole range of BAUSCHLINNEMANN foils and edgings is made without use of hazardous raw materials containing heavy metals. We guarantee observance of the limits for heavy metals under DIN EN 71-3.
- **Colorants:** We confirm that our products do not contain any azo dyes as per the Commodities Ordinance.
- **Formaldehyde:** Our products are continuously tested from an independent institute to ensure that they comply with standards on the discharge of formaldehyde, which is confirmed by a test certificate for comparable emission categories.
- **BAUSCHLINNEMANN** foils and edgings, of course, do not contain any other legally prohibited substances damaging to health or environment or, respectively, they comply with prescribed standards and limits.

Handling

Our products are not subject to declaration as prescribed in the Hazardous Materials Code. In ecological terms, no special measures have to be taken for handling or storage. When processing at increased temperature, we recommend use of suction appliances.

Waste disposal

We recommend thermal disposal of waste.

We, of course, will be pleased to answer any further questions you may have.
